

CAMPAIGN: 4/2018

Topic: Finger injury

Goals: To create awareness among cadet and staff about Finger Injuries, their causes and precautions to be taken.

Core Team: Faculty Incharge, HSE Instructor, HSE Committee members, senior cadet captain, Group Leader each team.

Participants: All cadets.

Resources:

- Videos
- E - Safety posters
- Injury Reports
- Class room boards
- Computers
- Quiz paper.
- External speaker
- Poster Colors

Activities:

- Announcement in the muster about launching the campaign.
- Videos related to Finger Injuries.
- E- Posters related to Finger Injuries will be displayed continuously on the display screen.
- To identify the cause of Finger Injuries and understanding the concept of unsafe act and condition.
- E - Poster competition (to be divided between good practice and bad practices).

- Quiz competition related to Finger Injury causes and prevention.
- Presentation by cadets in their classroom related to the injury taken on board the ship.
- Best group award of the campaign.

Tactic:

- As a first step towards the campaign, a meeting of the core team will be held in which they will be briefed about the plan and the various events organized during the week.
- An announcement will be made in the muster on Saturday stating the division, which will participate in the campaign from Monday, along with the topics. (Each division will have a campaign for a week, thus making it a 2 month program for 8 divisions).
- The participating division will then be divided into 10 groups, 4 members each.
- EVENT 1: Based on the topic for the week, videos will be screened so that the cadets get a fair idea about the topic in an audio-visual format.
- EVENT 2 a): E-Poster will be shown on the digital screen in academic block to create a general awareness about Finger Injuries and its consequences.
- EVENT 2 b) : Each group has to read at least 1 case study of finger injury taken place on board the ship and has to write a brief report on the accident.
- EVENT 3: A poster making competition related to the case of injury will be held to encourage the cadets to think creatively about the topic and come up with a good understanding regarding it.

- EVENT 4: A quiz competition based on the theme will be held where each group will nominate one cadet for the quiz.
- EVENT 5: Each group has to make a case study presentation of accident & incident related to finger injury and each group along with their teammates has to present the same case study in their classroom after class time (1630 hrs.) in presence of the HSE team and faculty member.
- An external speaker will be called (occasionally) to speak about the topic and give the cadets a good insight about it.
- Finally, based on the performance in various activities throughout the week “best group” award will be given away!!

Videos:

Few common Engine room finger injuries are shown and explained in this video this video.
